# 1. About camera

## 1.1 Product introduction.

This is a digital HD IP camera for monitoring. It connects to the Internet to send and receive data, and you can use it to remotely view real-time images from your mobile phone, computer or other device anytime and anywhere, it can save surveillance videos in the Micro SD card, computer or other device such as an NVR, The camera also supports alarm functions such as sending alarm emails, alarming cell phone message push and other functions.

## 1.2 Product should contain:

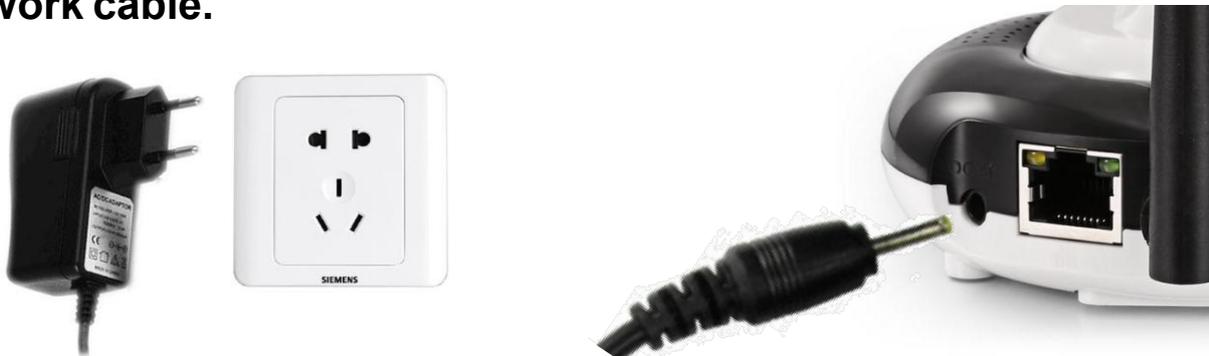

- IP Camera\*1      Power adapter\*1
- User manual\*1   Network cable\*1
- Bracket\*1      Screws bag\*1

## 1.2 Interface.

## 2. Connect camera

**2.1 Plug in power adapter and connect to camera, you can not connect the network cable.**

If you use a network cable to connect the camera to the router(**The router must be able to connect to the Internet**), you can jump directly to “3. View via mobile phone”.

**2.2 Camera will self test for one minute, then insistently give out the "ding-ding-ding..." sound.**

*Ding-ding-ding...*

If you don't hear “ding-ding-ding...” sound, please reset the camera until hear the sound.

**2.3 Download “CamHi” from Google Play Store / Apple App Store or scan the QR code below to get APP information.**

## Quick Start Guide

Android

IOS

## 2.4 Run APP and configure the WIFI of camera then follow the steps below.

The image shows three sequential screenshots of the CamHi app interface on an Android phone. The first screenshot shows the 'Camera' main screen with an 'Add Camera' button highlighted by a red callout bubble containing the text '1. click "Add camera"'. The second screenshot shows the 'Add Camera' configuration screen with fields for Name, User Name, UID, and Password, and a 'Wireless Installation' option highlighted by a red callout bubble containing the text '2. click "WIFI Installation"'. The third screenshot shows the 'Wireless Installation' screen with fields for SSID and Password, and an 'Apply' button highlighted by a red callout bubble containing the text '3. enter WIFI password and click "Set"'. Below the 'Apply' button is a 'Warning' dialog box asking 'Do you hear the sound from camera?' with 'No' and 'Yes' buttons, and a red callout bubble containing the text '4. click "YES"'. The bottom navigation bar of the app is visible in the first two screenshots, showing icons for Camera, Picture, Video, and About.

Make sure your phone is connected to WIFI and can connect to the internet.

Your WIFI name must be english and can not contain special characters.

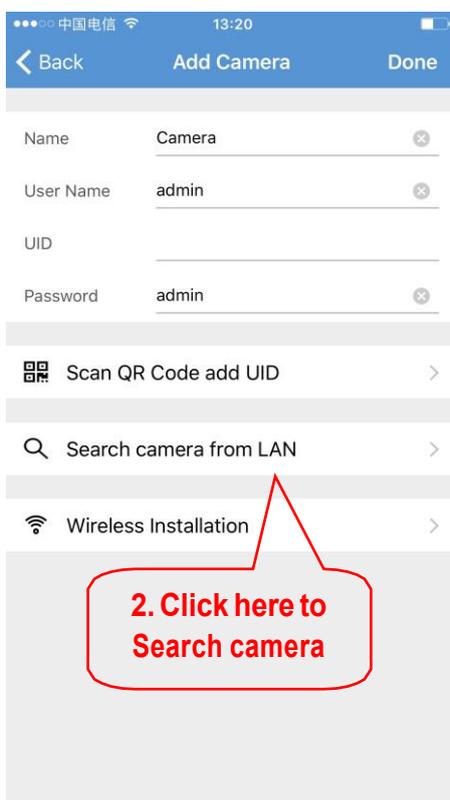

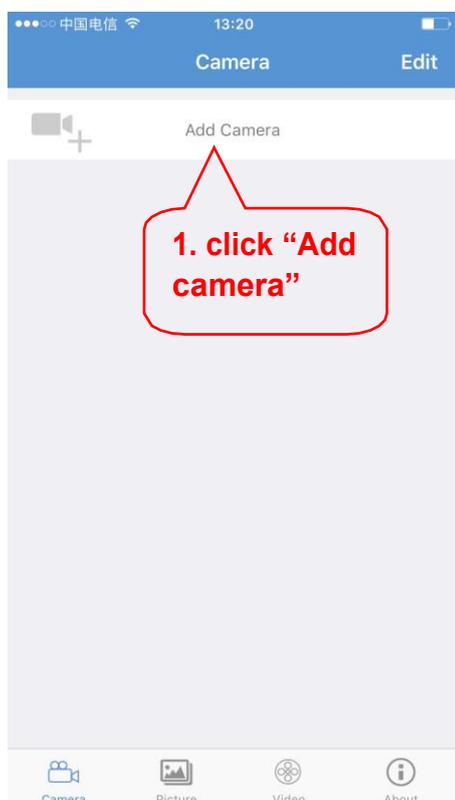

## Quick Start Guide

When the camera sends a “Dong —” tone, it means that the camera is connected to your WIFI, and the operation will jump to “3. View via mobile phone” step 3 of 3.1.
